Accounting Conventions	
Definition	Equity security is a security that represents ownership in a corporation. In general, stocks are riskier than debt securities as they has a lower priority claim , in the event of liquidation. The advantage of holding the ownership is that the holders will enjoy the success of the company through the dividend and capital gain. However the holders have also a chance of receiving no dividend and capital loss.
Classifications	<p><b>Market</b> comprises of domestic and international. Domestic market refers to the market that locates within Thailand's territory, otherwise is international markets.</p> <p><b><u>Involved party classifications</u></b>  <b><u>Company's ISIC code as registered with the Ministry of Commerce</u></b>            Note: ISIC is the International Standard Industrial Classification of All Economic Activities, which the MoC currently uses the 3.1 revision.</p> <ul style="list-style-type: none"> <li>A.
